WHAT'S IN THE BOX

Note: The port layout on your modem may be slightly different.

DSL Modem   Modem Power Adapter   Ethernet Cable   Phone Cable
HOW TO CONNECT YOUR DSL MODEM

After a DSL connection has been installed in your home (remotely or physically), please follow these instructions to connect your DSL modem:

1   Connect the **DSL Modem** to the active phone jack on the wall using the **Phone Cable** provided.

2   Connect the **DSL Modem** to a power outlet using the **Power Adapter** provided. If the device does not power on, look for a power switch. The modem will automatically download the proper configuration files. Please wait a few minutes for this process to complete.

3

Connect using a Computer

Connect the **DSL Modem** to a computer with an Ethernet port, using the **Ethernet Cable** provided with the modem.
4

Connect using WiFi

Network/SSID: Worldline_2.5G or Worldline_5G

Password: Serial number (S/N) - located on the modem sticker (Any letters in the S/N must be capitalized for the password)

Visit support.fongo.com for instructions on changing the name and password of your WiFi network.

Note: Make sure the modem has been connected in the correct order. If you are still having trouble: Unplug the modem and wait 30 seconds. Reconnect the modem again starting at **Step 1**.
